Rice Straw Raw Material Koshihikari Paper

Koshihikari Paper (under application for trademark registration) is a new special product of this region. The citizens are hoping this paper will be a big success. This paper is developed by Minamiuonuma City with the cooperation of Nagaoka Factory, Hokuetsu Paper Manufacturing Company (in Nagaoka City) and is now sold by a legally incorporated foundation, the Rhododendron Lake Development Organization. The paper produced using rice straw from local Koshihikari blended into high-quality pulp materials has high water absorption and an ingenuous texture based on the fiber of rice straw sprinkled over the paper. The paper has been used for rice bags and business cards. Now, sets of letter pads and envelopes (500 yen with tax), message pads (350 yen for 20 sheets), and postcards (350 yen for 10 sheets) are also available.
